July 28, 2015

Dear Members,

It gives me immense pleasure to welcome you all to the AIPPM, being simulated at CISMUN 2015. Being the *Speaker* of the AIPPM, I don't want to give you the complete research material, This guide will just act as a direction of your research and hence can not be quoted in the Committee sessions aswell.

Also kindly note, that the executive board would be following an "Intervention based policy" while dealing with the proceedings of the committee. That being said be assured that such intervention shall be only when the committee would require a proper direction (which happens to be most of the time).

Members shall **not be permitted to use their Laptops¹ except during the Private Sessions**. Further, usage of every other electronic device shall be banned during the entire duration of the committee. Those in violation of this cardinal principle shall be liable for suspension from that day's proceedings.

Also, it is expected that all you ensure you follow the dress code without fail. It would be advised to come in Indian Attire; alternatively Formal Western Attire would also work.

In addition to all of the above, there is just another very important requirement for the committee, that being a Policy Statement². The Policy Statement is basically a reflection of what is your stand with regards to the agenda/s at hand. It should be a comprehensive summary of the entire research you have made. **Two copies of the Hard Copy are to be submitted during the first session of day 1.**

And should the members have any doubts or seek any clarification about any aspect of research, agenda, policy statement or debate; do feel free to contact either me. I would be glad to assist you in any way possible.

In anticipation of a healthy and constructive discussion;

Regards

Gautam Seth

¹ Laptops refer to the device not the internet connection; for those who don't get it :P

² Guidelines w.r.t the Policy Statement is as provided for in the Introductory Document of the committee.

1). Corruption Charges on Current Government

The current NDA Government came to power with high anti-corruption promises with special focus on Prime Minister's Statement "Na Khaunga Aur Na Khane Dunga" but recently starting with Vyapam then Lalit Modi case and further Fake education degree. Many allegations have started being raised against the government. This is a question on the People's faith on the government's anti-corruption policy. Focusing on all this the members must do comprehensive research and not just make it a blame game but come out with brief solutions.

2). RAPE AND MARITAL RAPE LAWS IN INDIA

Focus on the sexist nature of the said laws and how hypocrite they are. Suggest / Argue the Alternatives to the same and in case you support them in the current form, justify how the Rape laws aren't biased against men while, Marital rape laws are biased against women. Further also focus on aspects of Rape Laws pertaining to inadequate punishments, age of Juveniles and the exemptions thereof. Examine the need for stringent marital rape laws highlighting the horrendous nature of existing law/s to this regard.

3. FATE OF ARTICLE 370 OF CONSTITUTION OF INDIA

Some say that the missing link of National Integration is Jammu & Kashmir and this according to these people is because of Article 370; while there are some others who say the only reason India has been able to successfully hold on to Jammu & Kashmir is because of Art. 370. Your work is to look at the individual you are representing, the party that said individual is from and what is their say on Art. 370. Please, don't just harp about the historic perspectives of Art. 370 rather talk about the Indira – Sheikh Accord; Concept of Plebiscite; Relate Art 370 with Security Council Resolution 47 of 19483 ; Explore the Social, Economic and Legal advantages / implications of the said provision
